Measuring Your Room

Follow this checklist to gather all the necessary information to design your new room. Please use millimetres as the measurement if possible, alternatively inches can be used.

Please clearly state:

1. Measure the width, length and height of the room.
2. Indicate the position of gas, water, air vents and any electrical sockets.
3. If you have copy of your house plan that contains your kitchen dimensions please bring this with you.
4. If existing kitchen appliances are to be incorporated into your new kitchen, please state their dimensions.
5. Measure the size, location and direction of the opening of all doors. The door frame & architrave must also be included in this measurement.
6. Please indicate on drawing exterior walls.
7. Indicate the position of any radiators, meters, boilers etc. and please state dimensions.
8. Measure the size of all windows and height from the floor to base of windowsill.

Guideline for your room measurements
